

## Segno / Armchair with teak seat Design / Aldo Ciabatti

Segno defining element is simplicity: Segno, a collection which relies on horizontal lines as its identifying feature. Available in two different sizes, the versatile Segno bench, with its distinctive line motif, is the perfect seating element for those who love simple design and comfort.

### Description

Code: **267**  
Typology: **Lounge Chairs**  
Collection: **Segno**

Stackable: 8  
Static Load: 200 Kg

### Technical Info

Width: **52 cm**  
Depth: **53 cm**  
Height: **84 cm**  
Weight: **6.8 Kg**  
Static Load: **200 Kg**  
Seat Cushion:

### Packaging

Packages: **1**  
Pieces for pack: **4**  
Dimensions: **97x66x55 cm**  
Volume: **0.352 mc**

Polyethylene bag and cardboard box

Segno / Armchair with teak seat  
Design / Aldo Ciabatti

Colors

Military Green - Teak

Antique Iron - Teak

Matt White - Teak

Black - Teak

Indian Brown - Teak

### Materials

#### Steel

Iron and carbon alloy, with carbon content below 2%, treated to withstand the elements with the unique EMU-Coat anti-corrosion process.

**Maintenance:** To keep the product in good condition for a long time, we recommend storing it indoors and in a dry place during the winter to prevent condensate from forming. Before the winter and on a quarterly basis, if the products are kept near the sea, it is recommended to clean the metal surfaces with a soft cloth using water or detergent and protect them with Vaseline oil or car wax.

#### Teak

Traditional wood used for outdoor furniture with an exotic and timeless appeal. Teak is a hard wood with a high oil content suitable for outdoor use, without the need for painting. If it does not receive any protective treatment, the surface will weather into a silvery-grey nish, the natural protection of the internal part of the wood, considered an essential part of teak's charm.

**Maintenance:** To keep the product in good condition for a long time, we recommend storing it indoors and in a dry place during the winter to prevent condensate from forming. Before the winter and on a quarterly basis, if the products are kept near the sea, it is recommended to clean the metal surfaces with a soft cloth using water or detergent and protect them with Vaseline oil or car wax. As it is a natural material, changes in colour or cracks due to the level of humidity and sudden changes in temperature may be observed. If it does not receive any maintenance treatment with the periodic application of common and specific oil-based protective products, the surface will weather into a silvery-grey nish that can be removed with light surface sanding and subsequent polishing with a hessian cloth. Small surface stains caused by oil or other foodstuffs must be removed immediately, before the wood absorbs them, by sanding the area concerned and polishing it with a hessian cloth. When the wood is wet for the first time, it is normal for the surface to become slightly rough when it dries; the initial polished-effect can be restored with light surface sanding and subsequent polishing with a hessian cloth.
